Introduction iv

Changes in nomenclature v

Summary of number of interceptions listed by country of origin 1

Insects :

Listed by name of pest 5

Listed by name of host 107

Listed by country of origin 159

Mites :

Listed by name of pest 191

Listed by name of host 195

Listed by country of origin 197

Mollusks :

Listed by name of pest 198

Listed by name of host 202

Listed by country of origin 205

Diseases :

Listed by name of pathogen 207

Listed by name of host 213

Listed by country of origin 216

Nemotodes :

Listed by name of pest 218

Listed by name of host 219

Listed by country of origin 220

List of Intercepted Plant Pests
Fiscal Year 1983
Biological Assessment Support Staff
Technical Information Unit

INTRODUCTION

This publication represents the 66th annual report of pests and pathogens found in agricultural quarantine inspection. It is the tenth in the series to be assembled and printed from computerized interception records. It summarizes records of exotic living plant pests or pathogens of quarantine significance found in, on, or with plants, plant products, carriers, and container vans, imported or entering into the continental United States and Hawaii or the offshore possessions, or moving between these areas.

Accumulated totals for organisms are listed under headings indicating either that the intended use of the contaminated host is consumption or propagation, or that the item is not intended for importation and is designated as nonentry.

Incompletely identified organisms belonging to economic pest groups are included in the lists when they are not taxonomically separable to the degree required for a comprehensive pest risk assessment.

Honeybees of the genus Apis are included to reflect enforcement of the Honeybee Act of 1922, as amended 1976.

This list was compiled from interception records processed during fiscal year 1983. Insect, pathogen, mite, and nematode identifications are made by personnel of Plant Protection and Quarantine (PPQ), Animal and Plant Health Inspection Service (APHIS), the Insect Identification and Beneficial Insect Introduction Institute (IIBIII), Agricultural Research Service, and cooperating scientists.

Scientific names of listed organisms were reviewed by scientists of PPQ and IIBIII. Scientific and common names of host plants were verified using Hortus III, Standardized Plant Names, and other botanical resources.

PEST ORIGIN

Countries of origin shown for pest interceptions are obtained from the best available source at the time of interception. They are not meant to be used for the purpose of providing distribution data for a pest. Though not meant to be definitive, every effort is made to ensure the accuracy of this information.

CHANGES IN NOMENCLATURE

INSECTS

Sternochetus sp. (Curculionidae)-----(=Cryptorhynchus sp. (Curculionidae))

Sternochetus mangiferae (Fabricius)--(=Cryptorhynchus mangiferae (Fabricius)
(Curculionidae) (Curculionidae))

Sternochetus olivier Faust----------(=Cryptorhynchus olivieri Faust)
(Curculionidae) (Curculiondae))

NEMATODES

Heterodera avena Wollenweber---------(=Bidera avenae (Woll.) Krall & Krall)

Heterodera latipons Franklin---------(=Bidera latipons (Franklin) Krall & Krall)
